The need for RA was felt back in 1950 due to multiple tragedies (thalidomide tragedy). Pharma industry is the most regulated one, & Requirements of Authorities change constantly

- Provides guidance/ insights into development through agency wisdom collected, guidelines & previous experience
- Helps to reduce developmental failures (right from the development of the product till registration of the product & also after commercialization)
- Pre registration and Post registration activities, (query, variations renewals etc.)
- Bridges the gap between authority and company.
