Eco-Friendly Transportation Policy

Introduction:

Transportation plays a significant role in the environmental footprint of any institution. Sanjivani college of Pharmaceutical Education and Research (SCPER) acknowledges the importance of reducing carbon emissions, promoting sustainable mobility, and minimizing environmental impact through eco-friendly transportation practices. This Eco-Friendly Transportation Policy outlines SCPER's commitment to implementing and promoting sustainable transportation solutions across its campus.

Policy Statement:

At SCPER, we are committed to promoting eco-friendly transportation options that prioritize environmental sustainability, reduce greenhouse gas emissions, and enhance the overall well-being of the university community. Our Eco-Friendly Transportation Policy is guided by the following principles:

➤ Promotion of Electric Vehicles (EVs) and Low-Emission Vehicles:

SCPER actively promotes the use of electric vehicles (EVs) on campus & implements the same by using EV vehicles in the campus. We provide charging stations for electric vehicles, incentivize the purchase of EVs through discounts or subsidies, and raise awareness about the benefits of electric transportation among the college community.

➤ Pay and Use E-Bike Program:

In line with our commitment to sustainable mobility, SCPER promotes the use of electric bikes (e-bikes) through a pay-and-use program on campus. This initiative provides an accessible and environmentally friendly transportation option for students, faculty, and staff, reducing reliance on conventional gasoline-powered vehicles.

➤ Public Transportation Promotion:

SCPER encourages the use of public transportation among students, faculty, and staff. We collaborate with local transportation authorities to improve access to public transit options, provide information about bus routes and schedules, and offer incentives such as discounted or subsidized transit passes.

➤ Carpooling Initiatives:

To further reduce carbon emissions and traffic congestion, SCPER promotes carpooling among employees and students. We facilitate carpool matching services, provide designated carpool

parking spaces on campus, and offer incentives such as preferential parking or reduced parking fees for carpool participants.

➤ **Support for Carpooling and Ridesharing:**

SCPER encourages carpooling and ridesharing as effective strategies to reduce traffic congestion, lower carbon emissions, and promote resource sharing. We will facilitate carpool matching services, designated carpool parking spaces, and incentives for students, faculty, and staff to participate in carpooling and ridesharing programs..

➤ **Eco-Friendly Campus Infrastructure:**

SCPER invests in eco-friendly campus infrastructure to support sustainable transportation initiatives. This includes the development of bike lanes, pedestrian-friendly pathways, and bikesharing programs to encourage active transportation and reduce reliance on single-occupancy vehicles.

➤ **Education and Awareness:**

SCPER is committed to raising awareness among students, faculty, staff, and visitors about the environmental impact of transportation choices and the benefits of eco-friendly alternatives.

We will provide educational resources, conduct outreach campaigns, and host events to promote sustainable transportation practices and behavior change.

➤ **Continuous Improvement:**

SCPER is dedicated to continuous improvement in eco-friendly transportation through research, innovation, and collaboration. We will regularly assess the effectiveness of our transportation initiatives, solicit feedback from the college community, and implement best practices to advance our sustainability goals.

Conclusion:

SCPER is committed to promoting eco-friendly transportation options and reducing the environmental impact of campus travel. By implementing this Eco-Friendly Transportation Policy and engaging stakeholders at all levels, we aim to create a more sustainable and livable campus environment for the benefit of present and future generations.
